---

## OVERVIEW

Dedicated and results-oriented individual with a strong foundation in software development and programming languages. Eager to leverage technical skills and experience in a challenging, hands-on role.

---

## TECHNICAL SKILLS

### Programming:

Java, C#, C/C++, Javascript, Python, HTML, CSS, XAML, SQL, Lua, System Verilog, Assembly

### Tools:

GitHub, Git, VScode, Visual Studio, Figma, JUnit, JavaFX, Gradle, MongoDB, Unix, ModelSim, Quartus, OpenAI APIs

### Frameworks and Libraries:

.NET Core, Windows App SDK

---

## EDUCATION

### University of California San Diego

Bachelor of Science, Computer Science

(Expected Graduation: 2025)

September 2021 - PRESENT

San Diego, California

### Relevant Coursework:

Data Structures, Algorithms, Operating Systems, Computer Architecture, Software Engineering, Agile Development

---

## PROJECTS

### Fluent Tic-Tac-Toe [↗](#)

Made using C#, Xaml, and WinUI3 to experiment with publishing my own desktop app. Currently has over 6000 impressions with a 6.33% acquisition rate on the Microsoft Store.

### C# Ray-tracer\*

Led a group project where we used C# and Visual Studio to create our own rudimentary ray-tracer that renders primitive shapes with global illumination, light sources, and reflections.

### Processor Design\*

Led my team in using Python, SystemVerilog, ModelSim, and Quartus to simulate and synthesize a suitable processor for FPGA and VLSI digital design.

### PantryPal\*

Team-built desktop app using Java, MongoDB, GPT-3.5, and Whisper to practice AGILE development. Generates recipes with ingredients list and step-by-step instructions based on user prompts.

### Personal Website [↗](#)

Built my own website from scratch with JavaScript, HTML, and CSS to develop basic web development experience.

\*Due to academic integrity, these project sources aren't publicly available, so contact me for more information if interested.
